

FOREST FIREWORKS LIMITED

Issue 19 volume 5

Autumn 2011 NEWSLETTER

Forest Fireworks

This Autumn it has been all about Halloween and Guy fawkes.

The Tramway Inn held its annual Halloween event with Live music and Sarah's Apple crushing.

The fireworks supplied by Forest Fireworks and fired by Simon Barrie and Mike Strophair.

The first Fireworks were fired by the children of Clive Greenaway in his memory. Clive tragically died in a light aircraft crash earlier this year and fired the show last year.

This year we are carrying Fireworks by Brothers and we are pleased to say the items we have chosen to stock have had good reports.

Stratford Upon Avon River Festival

I am pleased to say that Forest Fireworks working with (WRAP) Warwickshire Reminiscence Action Project raised over £800.00 pounds for the charity.

We held a raffle at this year's river festival with prizes donated from the Swan's Nest Hotel and other organisations and Forest Fireworks.

www.reminiscence.org.uk

The future 2012

We hope to link with the Nicol Unit and the friends of Stratford Hospital next year to raise funds for both organisations. This year the Nicol unit was refurbished with bright colours and a garden make over.

WRAP donated a 1920's wind up Gramophone. We would like some new 78's of the fifties if you have any to spare in good condition please ring 01789 262062

Retail Sales

Forest Fireworks are concentrating on selling quality fireworks to voluntary organisations and the general public.

The company web site depicts all the types of fireworks we stock and gives you a detailed description of what they produce when you light the touch paper. We also double wrap them in cling-film to ensure they will stay dry when set out before firing.

Kimbolton Display Rockets that are some of the best, manufactured by Zink in Germany. Great effects and within the law for decibels.

New regulations on rockets have reduced their impact on the sky by reducing the flash powder content. Remember we deliver free up to a 10 mile radius of Stratford Upon Avon and cling wrap our fireworks. We also try to be competitive with our prices.

Health and Safety Ladder Racking.

See below new ladder racking for our shells that are fired in displays. Each mortar has a space between each one. This is to stop each mortar affecting the next one if a mishap occurs.
